# Vicente, Albano

MRN: 353463

**Office Visit** 9/8/2025  
 Somerville Adult Orthopedics

Provider: Sambaziotis, Chris, MD (Orthopedic Surgery)  
 Primary diagnosis: Primary osteoarthritis of both knees  
 Reason for Visit: Referred by Sambaziotis, Chris, MD

## Progress Notes

Sambaziotis, Chris, MD (Physician) • Orthopedic Surgery • Encounter Date: 9/8/2025 • Signed

Mr. Vicente is a 91 yrs. old male who returns with advanced djd of the right and left knee and for bilateral synvisc one injections. The patient will f/u in 6 months.

After explaining the risks and benefits, the patient elected to proceed with bilateral knee visco supplementation injection and verbal informed consent was obtained. A time-out was performed including patient medical identifiers, procedure and procedural side. The right and left knee was prepped with Betadine and a total of 6 cc of synvisc one was injected into each knee. Previous entry of 'No instability' was a clerical error. On physical exam, patient exhibits bilateral knee instability (1+ laxity) and decreased ROM due to pain. Gait is unsteady and guarded

## Visit Diagnoses

M17.11 (Right knee OA), M17.12 (Left knee OA), and M23.53 (Chronic instability of knee, bilateral)  
Plan: Patient reports frequent 'buckling' of both knees and high fall risk. Rigid knee orthoses are medically necessary to stabilize the joints during ADLs as conservative treatment with soft sleeves has failed
